Maria - thank you for getting back to me. I'd appreciate it if you would let me know if Syringa continues to seek some sort of approval to illegally discharge — and especially if EPA takes any action on this sort of request. It probably goes without saying, but I'll say it just to be sure that there is no confusion, ICL is very much opposed to and strenuously objects to any unpermitted discharges from this or any other facility. Pursuant to our past litigation regarding Syringa, the operator has been ordered by the court to take certain steps to ensure that discharges cease and the facility is upgraded to comply with the law. Any further discharges would violate this court order. And we would likely file an other CWA citizen enforcement case against the operator if they do discharge.

-Justin

Hi Justin,

Jerry did contact me regarding Syringa's desire to discharge. However he did not proceed with an email as he had stated he would. I told him I was unaware of EPA issuing a permit for the type of discharge he was seeking (emergency type, from what I recall?). I suggested he send me more details and I could forward his questions or further conversations with our permitting staff. Let me know if you need anything else. I have yet to see an email.

Maria - I understand that a representative of Syringa Mobile Home Park in Moscow Idaho recently contacted you with regard to seeking approval to discharge their lagoons to the local creek. Could you please forward me Jerry's email to you? Also, have you, or anybody else at EPA, responded to him? If so, can I get a copy of that email or letter too?

-Thanks - jh
